EXAMINER'S AMENDMENT

And REASONS FOR ALLOWANCE

Claims 1-20 are pending in this application.

Claims 1-20 are allowed.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Amir A. Tabarrok (57,137) on 23 May 2008.

The application has been amended as follows:

In claim 1, line 3, after the phrase "said I/O read data", insert the words —is processed by an instruction in the virtual microcontroller, said instruction—.

In claim 6, line 4, after the phrase "read data", insert the words —is processed by an instruction in the virtual microcontroller, said instruction—.

In claim 14, line 4, after the phrase "read data", insert the words —is processed by an instruction in the virtual processor, said instruction—.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The closest prior art of record fails to teach or suggest

(Claim 1) wherein said microcontroller sends I/O read data to a virtual microcontroller, and wherein said I/O read data is processed by an instruction in the virtual microcontroller, said instruction is followed by a conditional jump instruction that resides on said virtual microcontroller [...] wherein said virtual microcontroller has means for detecting said I/O read data, and further has means for computing a speculative conditional jump address before a condition for said conditional jump instruction is satisfied after receipt of said I/O read data

(Claim 6) a virtual microcontroller operating in lock-step with a microcontroller, comprising: detecting an I/O read data sent by said microcontroller, wherein said I/O read data is processed by an instruction in the virtual microcontroller, said instruction is followed immediately by a conditional jump instruction that resides on said virtual microcontroller; after receipt of said I/O data, computing a speculative conditional jump address before a condition for said conditional jump instruction is satisfied

(Claim 14) a virtual processor operating in lock-step with a device under test, comprising: detecting an I/O read data sent by said device under test, wherein said I/O read data is processed by an instruction in the virtual processor, said instruction is followed immediately by a conditional jump instruction that resides on said virtual processor; after receipt of said I/O data, computing a speculative conditional jump address before a condition for said conditional jump instruction is satisfied

In combination with the other claimed elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
